GRAINGER®

FOR THE ONES WHO GET IT DONE

Boost Your Productivity & Quality with Help from a Metalworking Specialist

Get the most out of your machining, welding, cutting and grinding. Grainger offers an expanded portfolio of products and services, so you can get the supplies and equipment you need, when you need them.

In order to help you work through challenging metalworking applications and identify cost-saving solutions, Grainger has brought on board dedicated metalworking specialists. As application engineers and former machinists themselves, our specialists can provide individualized support based on their technical expertise and on-the-job experience.

At no extra cost to you, Metalworking Specialists can be brought into your plant to help:

- Evaluate products to enhance productivity and cut downtime
- Identify inventory management solutions
- Recommend supplier consolidation where it makes sense
- Apply the latest technological innovations
- Assist with improving challenging applications

Whether you're manufacturing large-scale sub-assemblies or intricate engine parts, having the right people, tools and processes can have a dramatic impact on production quality and efficiency.

Grainger Metalworking Specialists are:

- Knowledgeable about the latest trends
- Brand-neutral
- Committed to helping you reduce scrap and rework
- Experienced in metal removal and finishing

Contact your Grainger Rep to set up an appointment with a Metalworking Specialist today!

GRAINGER®

FOR THE ONES WHO GET IT DONE

Drive Costs Out of Production and Help Boost Profitability

Get a fresh set of eyes on your metalworking operations and see how you can help improve your production efficiency and profitability.

Our methodical approach includes:

- In-depth analysis of your metalworking operations, including procedures
- Review of current machine setup and equipment mix
- Inventory management audit
- Collaborative planning, with no pressure to buy
- Tool performance testing with documented cost savings

Contact your Grainger Rep to set up an appointment with a Metalworking Specialist today!
