

2018 NTMA Safety Award Winners Announced

The NTMA's Annual Safety Award Survey is based on the OSHA Form 300A which Federal Law requires companies with more than ten employees to complete and post visibly in their plant February 1 through April 30 of the year following the year covered by the form.

The purpose of the survey is to present the top-performing companies with an NTMA Safety Award Certificate that can be proudly displayed in their company, as well as provide NTMA the composite data that will allow them to represent the member with OSHA and other regulatory agencies. A company's eligibility to receive this award is determined by a calculation using the number of injuries versus the total number of man-hours worked in that calendar year. Those eligible to receive this award are among the best in the industry and something the owner and employees should be proud of.

Please join the NTMA in congratulating the NTMA members for receiving the award for their company's excellent safety performance!
