Opening Keynote:

*Will 2022 Be the Year That Things
Get Back To Normal?*

Presented by: Michael Guckes

Michael Guckes, Chief Economist for Gardner Intelligence will reveal the present state of manufacturing using Gardner's proprietary Business Index along with macroeconomic research. This presentation will further discuss the nexus of supply chains, production and employment. It will also explore the state of the consumer nearly 1-year after the end of the paycheck protection plan which boosted disposable income and sent demand for durable goods soaring in 2021. Gardner Intelligence's presentation will provide attendees with a clear picture of today's metalworking manufacturing landscape, actionable insights, and practical resources (some even freely available) that you can use to monitor changing business conditions for yourself.

General Session:

*The Reshoring Surge -
Learn the Benefits for Your Shop*

Presented by: Harry Maser

Reshoring is surging nationally. For decades, we lost 10,000s of business and millions of jobs to offshoring. It is now clear that shorter supply chains are lower risk and are more profitable for OEMs for 20 to 30% of products that are now imported. Over 1 million jobs have been announced reshoring since 2010. Find how to benefit from the trend. Takeaways include how to:

- Identify the products most eligible to reshore.
- Quantify the costs and risks of offshoring.
- Find companies that import what you make.
- Convince companies to reshore and buy from you.
